

Letter Building- Activity & Station

Suggested Levels: K-2

Time: 10-15 minutes

Objective: Letter identification and gross motor

Equipment: Foam blocks

Description: Instruct students to work in teams to build a specific letter using the blocks. Once each team is complete, instruct them to build a new letter.

Variations:

RELAY- Divide students into two teams and make it a relay to see which team can build the letter first. Forming a straight line the first person from each team must race to build the letter first and return to the back of the line. The team that completes the letter first celebrates with jumping jacks. The activity continues with a new letter.

STATION- To make this activity into a station, have students build as many letters as they can in the allotted time.
