

# Sight Words Swat Relay Activity

Suggested Levels: K-2

**Time:** 10- 20 minutes

**Objective:** Promotes locomotor movement while reviewing sight words

**Equipment:** Index Cards and 2 Fly Swatters (optional)

**Preparation:** On each index card, write one sight word.

**Description:** Spread out the index cards on a table or attach to a white board. Split the students into two groups. Have each group form a straight line about 5 feet away from the table. Instruct the first person in each line to go the table and find a specific sight word by slightly tapping it with the fly swatter. If fly swatters are not available, students can tap it with their hands. The student that swats the correct word first, along with their teammates does three jumping jacks. Both students join their team at the end of the line. The relay game repeats with the next two students in line finding a different sight word.

Students identify the correct sight word by tapping it with fly swatters.
