

# Sight Word Building Station

Suggested Levels: K-2

**Station Time:** 3-4 minutes

**Objective:** Sight word review and fine motor skills

**Equipment:** Tongs, letter cubes, and sight words written on index cards

**Description:** Lay three to four sight word cards on the ground. Instruct students to spell the letter by picking up the correct letter blocks with tongs.

## Budget Friendly Tip

If you don't have letter blocks, make your own like we did. Take small, plastic ice cubes (unfrozen) and write different letters on each side. The different letters on each side adds to the fine motor skill challenge since students have to carefully place the appropriate letter on the card.
